

¹³CIGNATURE ²H HEALTH™

Our Diagnostic Services

¹³Cignature ²Health™ is the world's first clinic to offer time-tested diagnostics previously unavailable to anyone outside of sponsored preclinical and clinical studies. With more than 20 years of development and testing behind us, we are now ready to foster a paradigm shift in therapeutic approaches to cancer, diabetes, obesity and other metabolic diseases. The application of our diagnostics will also usher in a new age of youthfulness, wellness and human performance.

²HEALTH™

Deuterium measurements using simple to get saliva samples allow you to determine your "true" capacity to make energy – ATP, the body's energy currency.

²MRI™

Our patented MRI tech allows you to see deuterium in fat, organs, tumors and the rest of the body.

¹³CIGNATURE™

Stable isotope-based metabolic profiling allows you to "see" exactly what your body does with everything you eat and when.

ORGANIC ACID MAP™

A nutritional test that uses urine metabolites to evaluate four critical areas of metabolism: GI function, cellular and mitochondrial energy production, neurotransmitter processing and amino acid/organic acid balance as influenced by vitamin and mineral cofactors.

WHAT'S YOUR GOAL
ENERGY FOR A BETTER YOU™

ENERGY FOR A BETTER YOU

¹³CIGNATURE ²H HEALTH™

EMPOWERING THOSE WHO ARE SICK AND
TIRED OF BEING SICK AND TIRED.

- HAVE MORE ENERGY
- FEEL HEALTHIER
- LOOK YOUNGER
- LOSE WEIGHT PERMANENTLY
- INCREASE MEMORY AND FOCUS
- SLOW AGING
- PREVENT DISEASE
- ACHIEVE MORE

Everything you drink or eat contains hydrogen.

Deuterium is a form of hydrogen that's twice as heavy as regular hydrogen.

ONLY 155 OUT OF EVERY MILLION HYDROGENS IN NATURE ARE DEUTERIUM

DEUTERIUM ENTERS YOUR BODY VIA THE FOOD AND LIQUIDS YOU EAT AND DRINK

Have you ever wondered why the food and supplements you're eating are not getting you the results you want? You have to get away from simply thinking about calories and carbs and start thinking about deuterium. Some foods we think of as "healthy" contain lower levels of deuterium while others don't. Junk foods and sugary snacks aren't good for you because they're usually made with deuterium loaded ingredients. This is important because your body is powered by nanomotors, tiny engines in your mitochondria that make energy (ATP) using the hydrogens in your food. Deuterium is so heavy that it breaks the nanomotors like sand in a fuel tank.

¹³CIGNATURE ²HEALTH™ MAKES SCIENCE SIMPLE: MORE ENERGY MEANS BETTER HEALTH AND WELLNESS.

EMPOWERING YOU WITH ADVANCED RESEARCH

Your body will break down, become diseased and prematurely age if you don't have enough energy to properly power your heart, skin, adrenal glands, brain, thyroid, muscles and other organs. Relying upon drugs, supplements or even exercise to make it better, without addressing the root cause, cannot work long-term. In fact, the inability of mitochondria to make enough energy is a hallmark of aging, cancer, diabetes and Alzheimer's.

HOW WE RESTORE YOUR METABOLISM

Your natural ability to keep deuterium below a level that deters your metabolism decreases as you get older, less active and sicker. So you must find ways to keep your level lower if you want to slow the aging process, prevent disease and stay healthy. ¹³Cignature ²Health™ offers two types of support.

Wellness Support: Healthy individuals use the ²Health™ test to establish their deuterium baseline. We then provide info to help them determine what effect a particular training regimen, diet, lifestyle, etc. will likely have on lowering it. They next make the changes right for them, retest their level once they've achieved a goal like weight loss or improved performance and then try to maintain or lower that level until they achieve their next goal.

Disease Support: Individuals with cancer, diabetes and other metabolic diseases use a structured program - we review their health history, medical labs, goals and baseline deuterium level before meeting with them. The meeting includes us educating them about the state of the art when it comes to standard of care, deuterium and their disease. It ends with us providing a protocol designed to improve their body's ability to deplete deuterium on its own as well as improving their levels using additional diagnostics, deuterium-depleted meals and water, and holistic therapies in concert with their regular physician.

"Let low deuterium food be thy medicine."

We Are World Leaders

¹³Cignature ²Health™ is founded on more than two decades of research and clinical results. The 2016 Noble Prize for chemistry was awarded for nanomotor research and peer-reviewed studies demonstrate high deuterium levels are related to deleterious biological consequences like cancer and diabetes. Our clinic (LabUSA0002) is a deuterobolomics educational facility partially funded under Los Angeles Biomedical Research Institute's project 2002790000. Related course topics are announced by the Office of Educational Opportunities (OEO) at LABIOMED and can be viewed publically at www.goo.gl/Gud8Xo. Views and data interpretations are solely that of ¹³Cignature ²Health™ and do not necessarily reflect those of the Food and Drug Administration, LABIOMED or UCLA.
